CONTENTS OF VOLUME 105

NUMBER 1, 22 FEBRUARY 1986

NAYFEH, A. H. and ASFAR, K. R., Response of a bar constrained by a non-linear spring to a harmonic excitation	1
MAJEWSKI, T., Audio signal modulation caused by self-excited vibrations of magnetic tape	17
TAKAHASHI, D., Wave propagation in ground-structure systems, Part I: Analysis of the model with surface contact	27
TAKAHASHI, D., Wave propagation in ground-structure systems, Part II: Parametric survey	37
VAKAKIS, A. F. and PAIPETIS, S. A., The effect of a viscously damped dynamic absorber on a linear multi-degree-of-freedom system	49
GYÖRI, I. and JOÓ, GY., Acoustic natural frequency analysis of tree-structure pipeline systems by personal computer	61
SHEN, Y. and GIBBS, B. M., An approximate solution for the bending vibrations of a combination of rectangular thin plates	73
GHOSH, A. K., Vibration of a cantilever beam on a composite support with base excitation	91
CRAGGS, A. and HILDEBRANDT, J. G., The normal incidence absorption coefficient of a matrix of narrow tubes with constant cross-section	101
DOWNES, B., An equivalent inertia matrix for a segment of a uniform Timoshenko beam of any geometry and material	109
PRICE, S. J. and PAIDOUSSIS, M. P., A constrained-mode analysis of the fluidelastic instability of a double row of flexible circular cylinders subject to cross-flow: a theoretical investigation of system parameters	121
PEDERSEN, P., A note on vibration of beam-columns	143
HOWELL, G. P., BRADLEY, A. J., MCCORMICK, M. A. and BROWN, J. D., De-Dopplerization and acoustic imaging of aircraft flyover noise measurements	151

Letters to the Editor

TAM, C. K. W., Excitation of instability waves by sound—a physical interpretation	169
NELSON, P. A. and ELLIOTT, S. J., The minimum power output of a pair of free field monopole sources	173
BERT, C. W. and NEWBERRY, A. L., Improved finite element analysis of beam vibration	179

ACHENBACH, J. D. and QU, J., Resonant vibrations of a submerged beam	185
BHAT, R. B., Transverse vibrations of a rotating uniform cantilever beam with tip mass as predicted by using beam characteristic orthogonal polynomials in the Rayleigh-Ritz method	199
VERMA, A. N. and KOTHARI, L. S., Free vibration of an elliptic ring membrane clamped along two confocal ellipses	211
TO, C. W. S., Response statistics of discretized structures to non-stationary random excitation	217
BALLAGH, K. O., Calibration of an anechoic room	233
DOWELL, E. H., Damping in beams and plates due to slipping at the support boundaries	243
WATKINSON, P. S., The practical assessment of errors in sound intensity measurement	255
BHATTACHARYA, A. P., Effects of edge restraints on the non-linear flexural vibrations of an imperfect cross-ply laminated plate resting on an elastic foundation	265
THAMBIRATNAM, D. P., Transient response of a string on an elastic base	275
BOHLENDER, D. A., BABOTT, F., IRWIN, P. J. and MATHEWS, T., A pulsed harmonic technique for the study of sound propagation in the atmosphere	283
FUKANO, T., TAKAMATSU, Y. and KODAMA, Y., The effects of tip clearance on the noise of low pressure axial and mixed flow fans	291
MOTTERSHEAD, J. E. and STANWAY, R., Identification of n th-power velocity damping	309
ALMGREN, M., Acoustic boundary layer influence on scale model simulation of sound propagation: theory and numerical examples	321
SUZUKI, S.-i., Axisymmetric dynamic behaviour of thick plate subjected to impulsive loads	339

Letters to the Editor

KRISTIANSEN, U. R. and JOHANSEN, T. F., A finite element study on the optimum shape of simple reactive expansion chambers	347
GUPTA, B. V. R., NARAYANAN, S. and GANESAN, N., Free vibration characteristics of periodically stiffened panels with damped stringers	351
GUPTA, B. V. R. and NARAYANAN, S., Effects of changing the various structural parameters on the overall damping of damped periodic structures	357

HARRISON, R. F. and HAMMOND, J. K., Approximate time domain, non-stationary analysis of stochastically excited, non-linear systems with particular reference to the motion of vehicles on rough ground	361
--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	-----

GRIEFAHN, B. and GROS, E., Noise and sleep at home, a field study on primary and after-effects	373
HOWE, M. S., Attenuation of sound due to vortex shedding from a splitter plate in a mean flow duct	385
NORTON, M. P. and GREENHALGH, R., On the estimation of loss factors in lightly damped pipeline systems: Some measurement techniques and their limitations	397
DI SCIUVA, M., Bending, vibration and buckling of simply supported thick multi-layered orthotropic plates: An evaluation of a new displacement model	425
GÜRGÖZE, M., On the approximate determination of the fundamental frequency of a restrained cantilever beam carrying a tip heavy body	443
MIZUSAWA, T., Natural frequencies of rectangular plates with free edges	451
FORYŚ, A., Periodic and non-periodic combination resonance in a non-linear system of rods	461
LUZZATO, E. and LECOINTRE, C., Some simple and effective methods for sound source identification with geometrical acoustic models	473
IRIE, T. and KOBAYASHI, Y., Steady state response of an internally damped spherical shell translationally or rotationally driven at an edge	491
LANGLEY, R. S., On various definitions of the envelope of a random process	503

Letters to the Editor

TO, C. W. S. and HEALY, J. W., Further comment on "Vibration analysis of straight and curved tubes conveying fluid by means of straight beam finite elements"	513
KOHLI, A. K. and NAKRA, B. C., Authors' reply	514
PRAMILA, A., On the gyroscopic terms appearing when the vibration of fluid conveying pipes is analyzed using the FEM	515
GUPTA, B. V. R., NARAYANAN, S. and GANESAN, N., Influence of applied damping treatment in different configurations on the overall damping of periodic structures	517
ANNOUNCEMENTS	523
BOOK REVIEW	531
HUMAN RESPONSE TO VIBRATION	533
INDEX TO VOLUME 105	537
